OR STYLE INSTANTLY

thin skin, hourglass — women's wedding outfit

 **Style**

stAiler is your personal AI Stylist

Problem Statement

Traditional e-commerce platforms provide generic search with limited personalization.

Many people struggle to style and find good clothes for themselves

Solution

- Deliver personalized fashion recommendations using our AI features
- Generates tailored fashion recommendations based on user body shape, skin tone, etc

Skin Tone Scanner

Run a local camera scan to mathematically isolate your skin tone and activate your seasonal color harmony.

Body Type Analyzer

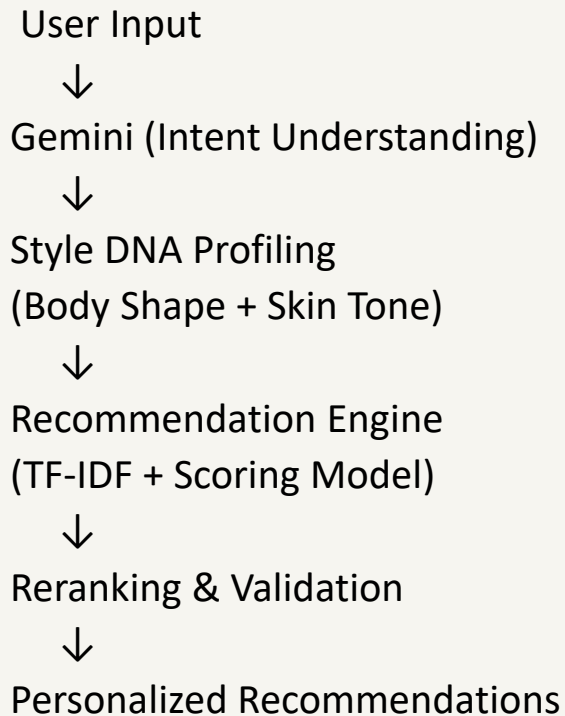

Predict your flattering silhouette using machine learning biometric ratios for a perfectly tailored draping fit.

Conversational AI

Refine your digital rack in real-time. Our stylist blends past query contexts using dynamic session memory weights.

Workflow

Layer	Technology
Backend	Django, Python
AI Integration	Gemini 3.5 Flash API
Machine Learning	Scikit-learn
ML Models	Logistic Regression, KNN
Recommendation Engine	TF-IDF, Cosine Similarity
